Transport, Mobilities and Spatial Change

Published in association with the Transport Geography Research Group (TGRG) of the Royal Geographical Society with the Institute of British Geographers

Series Editors: **Professor Richard D. Knowles** and **Professor Markus Hesse**

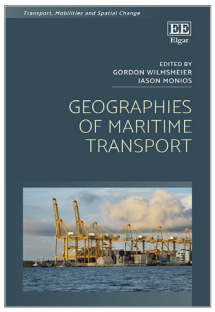

This Series provides an important new forum for cutting edge research into transport, mobilities and spatial change, for all modes, and at local to global scales. Analysis of transport policies, processes and behaviours that influence the movement of people, goods and information is essential in an increasingly globalized and urbanized world – not only since such mobilities are posing serious environmental concerns, but also as they have important repercussions for urban and regional developments.

CURRENT TITLES FROM EDWARD ELGAR PUBLISHING

Geographies of Maritime Transport

Transition from Transport to Mobilities

Edited by **Gordon Wilmsmeier**, Kühne Professorial Chair in Universidad de los Andes, Colombia and **Jason Monios**, Kedge Business School, France

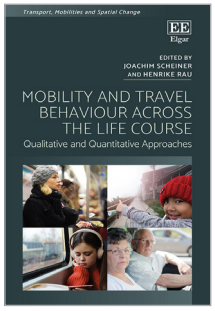

'Wilmsmeier and Monios have assembled a comprehensive investigation by the world's leading researchers into the many facets of maritime transport geographies. The 20 chapters provide excellent coverage of and insightful commentary on both traditional and emerging issues. This well-crafted book will be of interest to policy-makers, scholars and students.'

– Mary R. Brooks, Professor Emerita, Dalhousie University, Canada

2020 400 pp Hardback 978 1 78897 663 3 £116.00 / $173.00

Mobility and Travel Behaviour Across the Life Course

Qualitative and Quantitative Approaches

Edited by **Joachim Scheiner**, Technische Universität Dortmund and **Henrike Rau**, LMU Munich, Germany

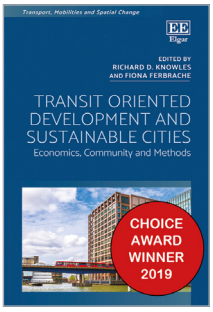

'This rich collection of research relating to mobility biographies provides a thorough insight into this immensely important field. It highlights innovative research from scholars that take seriously the role of everyday practices and the need for cross-disciplinary thinking in the field of mobility and transport. This is a must-read for researchers, students and practitioners in the field.'

– Malene Freudendal-Pedersen, Aalborg University, Denmark

2020 288 pp Hardback 978 1 78990 780 3 £100.00 / $145.00

Transit Oriented Development and Sustainable Cities

Economics, Community and Methods

Edited by **Richard D. Knowles**, School of Environment & Life Sciences, University of Salford, Manchester and Huddersfield Business School, University of Huddersfield and **Fiona Ferbrache**, University of Oxford, UK

'As TOD practice matures, executing the concept remains fraught with challenges and complexities. Knowles and Ferbrache advance theory and practice by synthesizing a large volume of literature and showcasing case studies from around the globe that examine economic development, sustainability, social development, and methods. This book serves as a foundation for students and practitioners across a variety of disciplines interested in enhancing their understanding of the multiple dimensions of TOD and how it remains a tangible method of advancing sustainable cities.'

– John L. Renne, Florida Atlantic University, US

2019 240 pp Hardback 978 1 78897 170 6 £85.00 / $130.00

Developing Bus Rapid Transit

The Value of BRT in Urban Spaces

Edited by **Fiona Ferbrache**, University of Oxford, UK

'This is a useful book that uses case studies from around the world to determine the value of BRT in a range of geographic contexts. The examples cover a variety of scales of systems from BRT lite, running largely in mixed traffic, to fully segregated schemes operating at high speeds and using sophisticated information systems. If you want to understand the potential of BRT as an effective urban mode of travel, this is an excellent place to start.'

– Roger Mackett, University College London, UK

Automated and Autonomous Spatial Mobilities

Aharon Kellerman, University of Haifa, Israel

'This is a very welcome book that treats the issue of automated and autonomous mobility in the mind-set of the book series in which it appears. It deals with transport, mobilities, and spatial change, with a strong historical, transport geography, technical, economic and social component. Kellerman has the gift of disentangling complex topics into very comprehensible, structured, and well-written research issues, whereby attention is paid to definitions, conceptualizations, social meanings, and interpretation. An excellent contribution!'

– Frank Witlox, Ghent University, Belgium

2018 224 pp Hardback 978 1 78643 848 5 £75.00 / $120.00

Decision-Making for Sustainable Transport and Mobility

Multi Actor Multi Criteria Analysis

Edited by **Cathy Macharis**, Vrije Universiteit Brussel, Belgium and **Gino Baudry**, Imperial College London, UK

'MAMCA is not just another multi criteria analysis methodology. We've applied it in more than 20 industrial and research projects and it never stopped surprising us positively by the often unexpected and "out of the box" findings it led to. Thus, this book is of fundamental importance to transport researchers performing impact assessment.'

– Angelos Bekiaris, Hellenic Institute of Transport, Greece

2018 256 pp Hardback 978 1 78811 179 9 £90.00 / $135.00
